EDUCATION

B. Tech. CSE (2012-2016)

 SRM University, Chennai

TECHNICAL SKILLS

Languages

- Java
- TypeScript
- JavaScript

Automation

- Playwright
- Selenium WebDriver

API Testing

- REST Assured
- Postman | Insomnia

Frameworks

- Cucumber BDD
- TestNG
- POM
- AI-DLC

Build Tools

- Maven
- Gradle

Version Control

- GIT
- GitHub
- Bitbucket

CI/CD Pipeline

- GitHub Actions
- TeamCity | Jenkins

AI Tools

- GitHub Copilot Agent
- OpenAI Codex

Pipeline

- Browser Stack
- Perfecto
- Sauce Labs

Others

- Accessibility Testing
- HTML | CSS
- JIRA | Rally

1

PROFESSIONAL SUMMARY

- QA Automation Engineer with **9 years** of experience in **Web UI Automation, API Testing, and Mobile Automation Testing**.
- Strong expertise in **Playwright, Selenium** and **REST Assured** (API Automation).
- Experienced in designing, enhancing, and maintaining **scalable automation frameworks** with reusable components, **coding best practices**, and **CI/CD integration** to support reliable and maintainable test automation.
- Proficient in **Playwright** features including Locators, Auto Waits, Fixtures, Parallel Execution, Trace Viewer, and custom HTML Reports.
- Experience working in Agile Scrum teams with CI/CD pipelines using **GitHub Actions**, and **TeamCity**.
- Strong knowledge of **Git, GitHub, Bitbucket, Maven, Gradle, JIRA, Rally & Figma**.
- Domain experience in Healthcare, Banking, and Education.
- Proficient in leveraging **AI-assisted** development tools (**Codex** and **Copilot**) to accelerate automation script development, debugging, code optimization, and test case generation, improving overall engineering productivity.

PROFESSIONAL EXPERIENCE

Wipro Ltd.

15-Nov-24 to Till date

Senior Software Engineer - QA SDET

Current Project: Optum Insight (UHG)

Domain: Healthcare

Automation Tool: Playwright (TypeScript) | AIDLC | Cucumber BDD

Description: Optum Insight develops APIs for healthcare providers. Responsible for designing, developing and maintaining Playwright automation framework using TypeScript and Cucumber BDD to validate end-to-end healthcare workflows across UI and backend services within the AI-DLC architecture.

Roles and Responsibilities:

- Developed and maintained automation scripts using Playwright with TypeScript following the AIDLC automation framework and Page Object Model (POM).
- Automated end-to-end healthcare business workflows across multiple application modules.
- Designed reusable Page Objects, utility classes, helper functions, and fixtures to improve framework scalability and maintainability.
- Developed BDD automation scenarios using Cucumber Feature files and Step Definitions.
- Implemented reliable Playwright locators using Role, CSS, XPath, Text, and Test IDs.
- Performed API validation and backend verification using REST Assured and Postman.
- Validated complete UI-to-API workflows through end-to-end automation scenarios.

Roles and Responsibilities (cont..)

- Investigated automation failures using Playwright Trace Viewer, screenshots, execution logs, and custom HTML reports.
- Analysed user stories and identified automation candidates during sprint planning.
- Executed smoke and regression suites through GitHub Actions CI/CD pipelines.
- Logged, tracked, and verified defects using Rally.
- Collaborated with Developers, Product Owners, and QA teams in Agile Scrum ceremonies to ensure quality releases.

Genpact India Pvt. Ltd.**19-Sep-22 to 13-Nov-24****Lead Consultant - QA SDET****Current Project: Morgan Stanley Wealth Management****Domain:** Banking**Automation Tool:** Java Selenium | Playwright | Cucumber BDD**Roles and Responsibilities:**

- Developed Selenium automation framework using Java, Gradle, Cucumber BDD, and Playwright with JavaScript using BDD.
- Automated banking workflows for Morgan Stanley Wealth Management.
- Developed reusable Page Objects and automation utilities.
- Performed REST API validation using REST Assured.
- Executed Mobile Automation using Appium across Android and iOS devices.
- Maintained automation framework and resolved automation failures.
- Executed regression suites through TeamCity.
- Reviewed pull requests and collaborated through GitHub and Bitbucket.
- Participated in Agile ceremonies and release testing.

BC Examinations and English Services India Private Limited (06-Oct-17 to 27-Jul-21) &**BC Education India Private Limited (28-Jul-21 to 18-Aug-22)****Project:** Internal Application for Managing Exams Operations

Description: British Council manages exams worldwide for which they maintain an internal application to manage their operational activities such tracking scheduling exams, managing vendor bookings, vendor payments and etc.

Roles and Responsibilities:

- Designed and executed manual and automation test cases for examination management applications.
- Automated eligible user stories using Selenium WebDriver, Java, Cucumber BDD, and Maven.
- Prepared test plans, test cases, and test data for sprint deliverables.
- Performed Functional, Smoke, Regression, and Integration testing.
- Logged, tracked, and verified defects through closure using JIRA.
- Worked closely with developers and business users following Agile Scrum methodology.

AI-Powered Android Application (Personal Project)**Technologies:** Android Studio, Java/Kotlin, AI Coding Assistant (Codex), Git**GitHub Link:** <https://github.com/fahadrafan/MileageTracker>**Summary:**

Designed and developed an Android application from concept to deployment to solve a real-world personal problem. Leveraged AI coding assistants including OpenAI Codex and GitHub Copilot to accelerate feature development, debugging, UI implementation, and code optimization while exploring modern AI-assisted software engineering practices.
